

VIGHNESH KHONDRE

Kolhapur, Maharashtra, India | +91 8010633866 | khondrevighnesh@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on production experience across the **MERN and Next.js** ecosystems, currently **architecting and building** a full-scale housing platform (PuneStay) and a role-based Client-Technician system at Sustainfy Energy. Skilled in **React, Next.js, Node.js, TypeScript** and cloud-native tools including **AWS S3, DynamoDB, PostgreSQL, and CI/CD** pipelines. Strong foundation in system design, database architecture, and secure authentication.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js 15, React Native (Expo CLI), Redux, Tailwind CSS
Backend: Node.js, Express.js, Next.js Server Actions, REST API Design, Zod Validation
Databases & Cloud: MongoDB, PostgreSQL (Neon Serverless), Prisma ORM, AWS S3, AWS DynamoDB
Auth & Security: Auth.js (NextAuth v5), JWT, bcrypt, Role-Based Access Control, Upstash Redis Rate Limiting
Tools & Practices: System Design, Git, GitHub, GitHub Actions/CI-CD, Vercel, Postman, Agile/Scrum

EXPERIENCE

- Sustainfy Energy — Software Developer Intern

Pune District, Maharashtra, India · On-site

Mar 2026 – Present

 - Built a cross-platform mobile application (**React Native**) for internal company use, serving both clients and field technicians.
 - Currently **designing and building a unified Client-Technician service app** from the ground up, owning system design across backend, frontend, APIs, and database architecture.
- Kiran Academy — Trainee Developer (Industrial Training & Internship)

Virtual / Pune, India

Jun 2025 – Jun 2026

 - Completed a six-month industrial training program, building an end-to-end project on the **MERN stack** under guidance of the technical team.

PROJECTS

- PuneStay — Full-Stack Housing & Flatmate Platform — Next.js / PostgreSQL / AWS S3

Next.js 15 · TypeScript · PostgreSQL · Prisma · Auth.js (NextAuth v5) · AWS S3 · Tailwind CSS · OpenStreetMap

Jul 2026 – Aug 2026

 - Architected a full-stack housing portal for students and professionals in Pune with property discovery, multi-tiered role access, and a **zero-photo urgent flatmate finder** with 60-second posting flow.
 - Engineered **Edge Authentication & RBAC** (NextAuth v5, bcrypt) enforcing role-based routing across Seekers, Property Admins, and Super Admins via Next.js Edge Middleware.
 - Integrated **AWS S3** media pipelines for direct property image uploads and embedded free **OpenStreetMap** for interactive geolocation and turn-by-turn directions.
 - Implemented **sliding-window rate limiting** (Upstash Redis) and phone-number anti-scraping shields to prevent abuse on the flatmate noticeboard.
 - Built a **Super Admin governance layer** with a verification queue, platform overrides, and automated security audit logs.
 - Configured end-to-end **CI/CD with GitHub Actions** for automated typechecking, linting, migration-drift detection, and zero-downtime Vercel deployments.
 - Prevented connection exhaustion on serverless Postgres using a **Prisma singleton pattern** against Neon's pooled endpoint, keeping the database stable under traffic spikes.
- Full Stack Expense Tracker — SpendWise — React / Redux / MongoDB

React · Node.js · MongoDB · Express · Redux Toolkit · Tailwind CSS

Dec 2025 – Jan 2026

 - Built an enterprise-style expense management platform with **JWT authentication & role-based access control**, supporting secure team-based expense approvals.
 - Designed **interactive Chart.js analytics dashboards** powered by MongoDB aggregation pipelines for instant multi-category spending breakdowns.
 - Added monthly **budget threshold alerts**, receipt-tagged expense CRUD, and **CSV/PDF report export** for financial record-keeping.
 - Used a **Redux Toolkit** state slice architecture for predictable store sync, achieving sub-100ms API response times with full auth-endpoint test coverage.
- BookStore — MERN Inventory & E-Commerce App — React / Firebase / MongoDB

React · Node.js · MongoDB · Express · Firebase Auth · Tailwind CSS

Jan 2025 – Mar 2025

 - Built a bookstore app with **Firebase OAuth/email authentication**, full inventory **CRUD**, category filtering, and a dedicated admin stock-management dashboard.
 - Implemented **debounced instant search** indexing, a shopping cart with order simulation, and a responsive glassmorphic UI with micro-interactions.
 - Designed a decoupled backend with an Express router layer and **Mongoose ODM** schema validation rules for reliable data integrity.

EDUCATION

- Bachelor of Computer Applications (BCA), Shivaji University, Kolhapur

2022 – 2025
- Senior Secondary (XII), Maharashtra State Board — Science, Vishwakarma Science and Commerce College, Kolhapur

2022

CERTIFICATIONS

- Introduction to Model Context Protocol** — Anthropic, Issued Jun 2026 (Credential ID: 6mk49nsgaag5)
- Introduction to Agent Skills** — Anthropic, Issued Jun 2026 (Credential ID: tfdxjh5y6kv5)
- Claude 101** — Anthropic, Issued Apr 2026 (Credential ID: ygiqpk3mr4kw)
- Python Programming** — HCL GUVI, Issued Aug 2023 (Credential ID: 97mZ2632678a11i3W3)
- Google AI Essentials** — Google, Issued Jul 2025 (Credential ID: 8XKYPOLKAUKP)
